

[YOUR NAME]

BACKEND DEVELOPER

[City, State] • [your.email@example.com] • [(000) 000-0000] • [linkedin.com/in/yourname] • [github.com/you or website]

PROFESSIONAL SUMMARY

[Backend Developer summary — 2–5 years of experience, server-side languages and frameworks, the APIs and data stores you work with, and reliability/scale results. Include keywords (REST, PostgreSQL, microservices).]

TECHNICAL SKILLS

Languages: [e.g. Java], [Python], [Go], [SQL]

Backend: [REST/GraphQL APIs], [Microservices], [Message Queues]

Data & Infra: [PostgreSQL], [Redis], [Docker], [AWS]

EXPERIENCE

[Backend Developer]

[Mon Year] – Present

[Company Name] — [City, State]

- [Achievement with a metric — what you did, how, and the measurable result (e.g. increased X by Y% or saved \$Z). Start with a strong action verb.]
- [Achievement with a metric — quantify scope, scale or impact.]
- [Achievement with a metric — focus on outcomes, not duties.]

[Backend Developer]

[Mon Year] – [Mon Year]

[Previous Company] — [City, State]

- [Achievement with a metric — what you did, how, and the measurable result (e.g. increased X by Y% or saved \$Z). Start with a strong action verb.]
- [Achievement with a metric — quantify scope, scale or impact.]

PROJECTS

[Service / Open-Source Name]

[Stack]

- [What you built and its impact — throughput, latency or reliability numbers.]

EDUCATION

[B.S. in Computer Science]

[Year]

[University Name] — [City, State]

CERTIFICATIONS

- [e.g. AWS Certified Developer – Associate (Year)]
