

[YOUR NAME]

DATA SCIENTIST

[City, State] • [your.email@example.com] • [(000) 000-0000] • [linkedin.com/in/yourname] • [github.com/you or website]

PROFESSIONAL SUMMARY

[Data scientist summary — years of experience, ML/statistics strengths, and the business problems you solve. Include keywords (Python, SQL, machine learning, A/B testing).]

TECHNICAL SKILLS

Languages: [Python], [SQL], [R]

ML & Stats: [scikit-learn], [XGBoost], [A/B Testing], [Forecasting]

Data: [Pandas], [Spark], [Airflow], [Snowflake]

EXPERIENCE

[Data Scientist]

[Mon Year] – Present

[Company Name] — [City, State]

- [Achievement with a metric — what you did, how, and the measurable result (e.g. increased X by Y% or saved \$Z). Start with a strong action verb.]
- [Achievement with a metric — quantify scope, scale or impact.]
- [Achievement with a metric — focus on outcomes, not duties.]

[Data Scientist]

[Mon Year] – [Mon Year]

[Previous Company] — [City, State]

- [Achievement with a metric — what you did, how, and the measurable result (e.g. increased X by Y% or saved \$Z). Start with a strong action verb.]
- [Achievement with a metric — quantify scope, scale or impact.]

PROJECTS

[Model / Project Name]

[Tools]

- [Result — model metric (AUC/accuracy) and business impact.]

EDUCATION

[M.S./B.S. in Statistics, CS or related]

[Year]

[University Name] — [City, State]

CERTIFICATIONS

- [Optional certification, with year]
