

[YOUR NAME]

Software Engineer

[City, State] • [your.email@example.com] • [(000) 000-0000] • [linkedin.com/in/yourname] • [github.com/you or website]

PROFESSIONAL SUMMARY

[Software engineer summary — your years of experience, primary languages/stack, and the kind of systems you build. Mirror keywords from the job description (e.g. React, TypeScript, AWS, microservices).]

TECHNICAL SKILLS

Languages: [e.g. TypeScript], [Python], [Go], [SQL]

Frameworks: [React], [Node.js], [Next.js]

Infrastructure: [AWS], [Docker], [CI/CD], [PostgreSQL]

EXPERIENCE

[Software Engineer]

[Mon Year] – Present

[Company Name] — [City, State]

- [Achievement with a metric — what you did, how, and the measurable result (e.g. increased X by Y% or saved \$Z). Start with a strong action verb.]
- [Achievement with a metric — quantify scope, scale or impact.]
- [Achievement with a metric — focus on outcomes, not duties.]

[Software Engineer]

[Mon Year] – [Mon Year]

[Previous Company] — [City, State]

- [Achievement with a metric — what you did, how, and the measurable result (e.g. increased X by Y% or saved \$Z). Start with a strong action verb.]
- [Achievement with a metric — quantify scope, scale or impact.]

PROJECTS

[Project / Open-Source Name]

[Stack]

- [What you built and its impact — users, stars, performance.]

EDUCATION

[B.S. in Computer Science]

[Year]

[University Name] — [City, State]

- [Optional: GPA, honors, relevant coursework]

CERTIFICATIONS

- [e.g. AWS Certified Developer – Associate (Year)]
